

# Esker 2020 Oats

## **High-yielding, disease-resistant oats built for reliable grain performance.**

Esker 2020 is a Wisconsin-developed grain oat variety bred for consistent performance across Upper Midwest growing conditions. Released by the University of Wisconsin–Madison, Esker 2020 improves on the original Esker line with higher yield potential, strong test weight, and dependable disease resistance growers can count on.

Designed for grain producers who demand reliability, Esker 2020 delivers uniform stands, excellent standability, and proven results in regional trials.

---

## **Why Choose Esker 2020?**

- **High grain yield potential**  
Consistently ranks among top-performing oat varieties in regional trials.
- **Excellent test weight**  
Produces clean, marketable grain with strong quality characteristics.
- **Very good crown rust resistance**  
Helps protect yield and grain quality throughout the growing season.
- **Strong standability**  
Medium-tall plant height with good lodging resistance.
- **Proven Midwest genetics**  
Developed and tested in Wisconsin for local conditions.

---

## **Agronomic Characteristics**

- **Primary use:** Grain production
- **Maturity:** Medium
- **Plant height:** Medium-tall
- **Standability:** Very good
- **Disease package:** Very good crown rust resistance
- **Adaptation:** Upper Midwest and similar growing regions

---

## **Ideal Fit For**

- Grain oat producers targeting high yield and test weight
- Growers looking for dependable disease resistance
- Operations needing a proven, university-developed variety
- Rotations that benefit from uniform emergence and standability

---

## **A Proven Oat You Can Trust**

Esker 2020 delivers the yield, quality, and reliability today's grain producers expect. With strong genetics and consistent field performance, it's a smart choice for growers who want dependable results from planting through harvest.
