

# Forage Plus Oats

Maximize Forage | Reliable Yield | Dairy-Focused

Forage Plus Oats are **specifically bred for high-tonnage forage production**. Designed for **silage, haylage, and grazing programs**, this variety delivers **strong yield, high digestibility, and consistent standability**, giving growers and dealers a **forage product that performs year after year**.

## Key Benefits

- **High Forage Yield** – Maximizes tonnage per acre
- **Superior Digestibility & Feed Value** – Supports dairy and livestock production
- **Strong Standability** – Medium-tall height with reduced lodging
- **Early & Adaptable** – Performs in northern climates and short growing seasons
- **Proven Multi-Location Performance** – Reliable across diverse soil types
- **Versatile** – Great alone or in blends with peas, brassicas, or other forages
- **Quick Delivery** – Seed ready when your customers need it

## Agronomic Overview

<i>Trait</i>	<i>Forage Plus Oats</i>
<b>Maturity</b>	Early-Mid season
<b>Plant Height</b>	Medium-Tall (~36–40 in)
<b>Lodging</b>	Moderate-Resistant
<b>Digestibility</b>	High
<b>Crude Protein</b>	12–14% (approx.)
<b>Test Weight</b>	38–40 lb/bu
<b>Certification</b>	Wisconsin Certified Seed

## Field Trial Performance

### Wisconsin & Midwest Trials

- **Yield:** 4.5–5.5 tons/acre dry matter (multi-location forage trials)
- **Standability:** Maintains strong, uniform stands across variable conditions
- **Feed Quality:** High digestibility and energy values, ideal for dairy and livestock

### Forage Blends

- Mixes well with peas, brassicas, or other cover crops for added tonnage and nutritional balance
- Supports both grazing and silage systems

## Ideal Uses

- Dairy & Livestock Silage Programs
- High-Tonnage Haylage
- Grazing or Dual-Purpose Rotations
- Forage Blends & Cover Crops

**Supplies are limited.** Please call to reserve your seed orders. Immediate delivery is available.
